

Streamline asset management with AT1+ Asset Trackers

The Fleet Complete for FirstNet AT1+ Asset Trackers, which are now FirstNet Trusted™ and available for use on FirstNet, offer one of the most cost-effective equipment tracking solutions on the market. These trackers provide visibility over your high-value assets in the field, allowing you to monitor the location and status of equipment, trailers and machinery in near real-time from your desktop or mobile device. Operating on the LTE

Cat-M1 network, AT1+ devices help ensure faster status updates and reliable service.

With asset tracking solutions from Fleet Complete for FirstNet, you gain mission-critical visibility without the need for onsite supervision. Streamline asset management, eliminate guesswork from managing multiple assets and empower your team to focus on public safety.

Cost-effective solutions for everyday applications

Asset and sensor monitoring solutions help organizations optimize maintenance and performance across assets, driving cost savings and efficiency.

Reports asset's location multiple times per day, with the ability to track asset movements over specific time ranges.

Fleet Complete offers both solar and battery-powered asset tracking devices.

Innovative solutions for various industries

Construction services –

Reduce the risk of losing or having equipment such as trailers, bobcats and generators stolen.

Paramedic and EMS services –

Receive instant alerts for high-value tools that may have been left behind.

Transportation –

Monitor trailer locations and manage arrival and departure times.

Trade services –

Ensure no high-value tools are forgotten onsite.

Key features

Better asset maintenance

Accumulated engine hours, operating hours or miles towed can be used to set maintenance schedules. This data can also help monitor “in-warranty” time.

Track asset utilization

Monitor the location and usage of assets based on their time in operation or total engine or operating hours.

Robust security and remote updates

Enjoy end-to-end encryption during data transfers to the cloud, and receive over-the-air updates to keep devices current with the latest features and functionality.

Both the AT1H+ and AT1S+ offer the same core features

1 Future-proof device

The device runs on the LTE Cat-M1 network and automatically receives software updates.

3 Easy installation

Securely install the device on any outdoor asset using glue, double-sided tape, or screws.

2 End-to-end solution

Enjoy a comprehensive system including the device, cloud IT, applications, data security, connectivity and customer support.

4 Rechargeable battery

The AT1H+ is hardwired and recharged when connected to power, and the AT1S+ charges via direct sunlight.

Dedicated support for a seamless setup

The Fleet Complete for FirstNet professional support team is here to ensure a smooth setup process. Benefit from custom training sessions, resources, videos and expert tips to get the most out of your solutions. As your organization grows, our team is ready to support your evolving needs. For easy self-installation and troubleshooting, download the free FC Install App available for Android and iOS devices.
