AT&T

Fuel Your Fleet Success with Powerful, Next-Generation Telematics

Connect to real-time fleet insights & in-vehicle Wi-Fi with AT&T Fleet Complete's most advanced fleet management device – the FTxw.
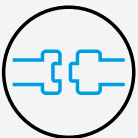

Put vehicle performance and driver behavior data at your team's fingertips. AT&T Fleet Complete connected fleet devices collect accurate, decision-worthy data and transfer it in near-real-time for analysis and reporting.

Collect near real-time vehicle data on location, engine idling, speed, and engine health. Plus, the FTxw gives you advanced collision detection and in-vehicle WiFi to keep you connected.

With FTxw, it is easier than ever to make informed decisions to enhance fleet efficiency, safety, and sustainability while meeting regulatory compliance requirements.

Getting Started is Simple

1

Connect the FTxw to your vehicle's OBD II port. The device will begin calibrating automatically.

2

Log into the FC Hub platform. Assign the device to the vehicle to begin monitoring.

3

And you're good to go! Connect to in-vehicle WiFi or vehicle data right-away.

Enhance operational efficiency and maintain connectivity anytime, anywhere with in-vehicle WiFi

WIFI Hotspot Functionality

Connect up to 10 Devices

Near Real-Time GPS Vehicle Data

Collect rich vehicle statistics on location, speed, engine idling, and more.

Expandability

Input and output ports to add devices like identity card readers.

Robust Security

End-to-end encryption during data transfer to the cloud.

Advanced Collision Detection

Receive alerts in the event of a collision and avoid potential incidents in the future.

Over-the-Air (OTA) Updates

Keep your device up to date to access the latest features and functionality.

Vehicle Health Monitoring

Capture critical ECM data including diagnostic trouble codes (DTC), fuel consumption metrics, and operation hours.
