

Simplify fleet telematics with Fleet Complete Connected Devices

Get real-time insights on the performance of vehicles and other assets, and status of drivers

Dispatch and operations officials face a number of challenges to ensure public safety and those who support them stay safe while on the road. These include enhanced situational awareness, rising operational costs, regulatory compliance and near real-time visibility into operations and assets.

Fleet Complete offer a full suite of tools that work together on a common platform, providing intuitive and near real-time insights on performance and status of fleet operations, drivers, heavy equipment and other movable assets.

FTxw Features and Benefits

- Full suite of tools that interoperate on a common platform
- Scalable solution across fleets of all sizes, vehicle types, and industries
- Fleet dashboards and automated reporting

FTxw hardware Features & Benefits

- FirstNet Trusted device
- Supports First Priority[®] - Priority and for first responder, preemption capabilities
- Plug-and-play hardware installation
- In-vehicle Wi-Fi[®]
- Real-time GPS tracking
- Fuel tracking and reporting for improved fuel efficiency
- Harsh braking/cornering detection

Fleet Complete Connected Devices

Fleet Complete Connected Devices includes hardware and software.

The FTxw, which is now FirstNet Trusted™ and available for use on FirstNet, is the new Wi-Fi enabled hardware built for public safety and those who support them. This hardware gives you support for up to 10 users for Wi-Fi connectivity, which means you can connect to critical applications while on the go.

FTxw is a universal plug-and-play device that plugs into the onboard diagnostics (OBDII) port, with full support for light and heavy-duty trucks, electric vehicles, and hybrids. FTxw supports LTE 4G connectivity, which enhances the speed of data flow. It also offers advanced GPS with near real-time data insights to detect safety issues, such as harsh braking, rapid acceleration, and other features and benefits.

Simplify your fleet telematics today and make the connection for safety. For more information, call (844) 844-0737 or contact your FirstNet Sales Consultant

Agencies and organizations that support first responders and require fleet tracking can use Fleet Complete Connected Devices, including:

- Transportation
- Wholesale and retail trade
