Fleet Complete
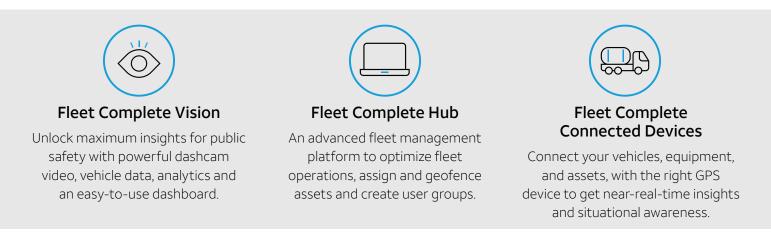

Fleet telematics made simple

A 360° view of your mobile business with just one click

Fleet Complete offers a fully integrated telematics platform engineered to provide insight into your public safety and public works operations. Its fully integrated suite of tools allows you to easily add features and extract insights for your organization's fleet.

Our solution enables you to monitor your fleet and assets to help promote safe habits and reduce risks to those operating vehicles and the public. Some insurance companies may even lower your premiums when you add a telematics solution.

The tools within Fleet Complete connect in one easy-to-use mobile platform. This delivers intuitive, near real-time insights on and help track the safety of your teams, vehicles and other critical assets.

Fleet Complete Vision

Unlock maximum insights for public safety with powerful dashcam video, vehicle data, analytics and an easy-to-use dashboard.

Fleet Complete Hub

An advanced fleet management platform to optimize fleet operations, assign and geofence assets and create user groups.

Fleet Complete Connected Devices

Connect your vehicles, equipment, and assets, with the right GPS device to get near-real-time insights and situational awareness.

Product Brief

Make the connection for safety

Fleet Complete Hub gives your department the flexibility to only add the telematics tools you need when you need them.

- Dispatch reports available for trip, driving, speeding, idling, stopping, geofencing and more.

- Advance your situational awareness with near real-time monitoring with easy to understand status, color-coded geofences, categorized ECM data, and point-of-interest names instead of addresses.

- Set up alerts for common events, such as arrival, departure, speeding, harsh braking or cornering and engine RPM limits.

- Group your fleet by organizational need, such as department or functions performed.

Benefits after effective deployment

15to
20% increase in vehicle utilization*
