AT&T Task Tracker

Follow the action on the field

Improve business efficiency, meet changing priorities, and enhance customer service – right from your smartphone.

AT&T Task Tracker is a cost-effective mobile workforce dispatching solution. Using the AT&T Fleet Complete cloud-based application, dispatchers can send activities to mobile workers based on their availability and workload.

With the AT&T Task Tracker app, the mobile worker can, in turn, accept activities and update the dispatcher on their status in near real-time.

- **Time stamp:** know when a mobile worker has updated an activity status to ensure the job is completed.

- **Activity time tracking:** track how long it takes to complete an assignment or a job for better allocation in the future.

- **Timecard:** keep your dispatcher informed on worker availability by allowing your crew to clock in, start break and clock out.

AT&T Fleet Complete

AT&T Business

Near real-time results

Keep track of your team's workload no matter what the task at hand. Once you assign an activity to someone in your crew, the request is accepted by a team-member out on the road. They will see the address and the specific instructions that you can leave to ensure the job is done right.

Easy to use interface

Have complete visibility over your team with the intuitive controls on the Booking Screen. You can view activities and filter requests by status defined as Open, Dispatched, Accepted, or Rejected.

Tracking screen that keeps you in the know

Jobs that are close to completion or that have been rejected are flagged with an alert so you can take immediate action and improve productivity.

Supported devices

Our AT&T Task Tracker App can be easily downloaded from the iTunes or GooglePlay stores and installed on your devices. AT&T Task Tracker runs on both Android and Apple smartphones and tablets.

AT&T Task Tracker solution details:
