

Protected cargo

Temperature monitoring solutions for food transportation industries

A solution that fits your fleet

Whether you manage a small or a large fleet of company vehicles, AT&T Fleet Complete has flexible solutions to suit your business needs. Get your fleet working together to achieve Food Safety Modernization Act (FSMA) compliance with our reliable temperature monitoring solutions.

Complete solution for mission-critical operations

Our submersible, rugged, wide temperature range probes are installed inside trailers and capture temperature readings at configurable intervals as low as 1 min apart, providing you with an accurate report of cargo integrity and vehicle status throughout the trip.

Automate record-keeping

- Capture near real-time vehicle location
- Monitor temperature readings inside the trailer
- Track arrivals, departures and proof of delivery

Optimize compliance

- Provide accurate reports for each trip
- Share the data in various formats
- Automatically store data for 12 months

Support drivers

- Configure alerts of temperature spikes
- Ensure continuous climate control
- Enable painless chain of custody hand-off

Temperature sensor

Temperature range -67°F - 257°F
Cable length 30 ft and 48 ft
Up to 4 probes per vehicle

Fleet Tracker

Real-time status and location
Driver behavior and vehicle status
IFTA and engine hours reporting

Desktop platform

Fleet performance dashboard
On-demand or scheduled reporting
Vehicle and asset management

Key requirements of the FSMA

- **Vehicles and transportation equipment:** The design and maintenance of vehicles and transportation equipment to ensure that it does not cause the food that it transports to become unsafe. For example, they must be suitable and adequately cleanable for their intended use and capable of maintaining temperatures necessary for the safe transport of food.
- **Transportation operations:** The measures taken during transportation to ensure food safety, such as adequate temperature controls, preventing contamination of ready-to-eat food from touching raw food, protection of food from contamination by non-food items in the same load or previous load, and protection of food from cross-contact, i.e. the unintentional incorporation of a food allergen.
- **Training:** Training of carrier personnel in sanitary transportation practices and documentation of the training. This training is required when the carrier and shipper agree that the carrier is responsible for sanitary conditions during transport.
- **Records:** Maintenance of records of written procedures, agreements and training (required of carriers). The retention time for these records depends on their type and the time when the covered activity occurred, not exceeding 12 months.

Exemptions from the FSMA rule

- Shippers, receivers, or carriers engaged in food transportation operations that have less than \$500,000 in average annual revenue.
- Transportation activities performed by a farm.
- Transportation of food that is transshipped through the United States to another country.
- Transportation of food that is imported for future export and that is neither consumed or distributed in the United States.
- Transportation of compressed food gases (e.g. carbon dioxide, nitrogen or oxygen authorized for use in food and beverage products), and food contact substances.
- Transportation of human food byproducts transported for use as animal food without further processing.
- Transportation of food that is completely enclosed by a container, except for food that requires temperature control for safety.
- Transportation of live animals, except molluscan shellfish.

Compliance dates

- Small Businesses - businesses other than motor carriers who are not also shippers and/or receivers, employing fewer than 500 persons and motor carriers and having less than \$27.5 million in annual receipts, would have to comply by April 2019.
- Other Businesses - a business that is not small and is not otherwise excluded from coverage would have to comply by April 2018.
