

Daycare and child transportation monitoring solution

- **Bus location and driver behavior:** AT&T Fleet Complete vehicle tracking solution captures and provides near real-time location of buses and driver behavior on the roads, allowing parents and daycare administrators to gain greater insight into the ETAs, the time of each stop made and safety score of each driver.
- **Geofencing:** Point of Interest virtual fencing allows daycare administrators to plot bus route stop addresses and send notifications to parents when the bus makes a stop at their closest bus stop and arrives/departs the school grounds.
- **Front/back door and stop-arm sensors** capture and log the time, location and duration of when the front or back doors open on the bus, as well as if the stop-arm was engaged at appropriate times.
- **Open API push notifications:** The system has the flexibility to integrate with third-party applications through the open APIs, offering the benefit of push notifications of bus location into such apps as SafeStop, Transfinder and more.
