

# Inspect by AT&T Fleet Complete

Inspect by AT&T Fleet Complete is a mobile application that allows city workers and first responder crews to complete vehicle and equipment inspections as required by city, state and federal regulations. Using this app, workers are able to easily perform pre/post-trip vehicle inspections, check-off the status of on-board kits and extra equipment, log any minor or major defects, and sign off on the report, providing fleet managers at the headquarters with a time-stamped, digital record for audits and compliance.

## Inspections for any type of equipment

- **City maintenance fleets:** drivers sign off on pre and post-trip status of graders, sweepers, salters and plows
- **Ambulance and EMS fleets:** paramedics log the working status of the ambulance and onboard BLS equipment such as gurneys, defibrillators and more
- **Fire engine and ERT fleets:** firefighters complete and sign off on the pre/post-trip DVIRs and the status of onboard equipment, such as First Aid Kit, fire axe and more
- **Police units and patrol cruisers:** officers check and sign off on the working order of all onboard equipment before and after duty

## Schedule regular equipment service, meet regulations, and improve worker safety

 <p>Efficient equipment inspections</p>	 <p>No paper trail</p>	 <p>Historic log of previous defects</p>
 <p>Direct connection to service shop</p>	 <p>Accurate audit trail</p>	 <p>Alerts of incomplete inspections</p>

## Web Mechanic Portal

After the routine vehicle inspection is completed, defect logs are accessible on the Mechanic Portal. From there, a mechanic can select any vehicle from the list and view all the repairs needed and sign off straight in the portal when they are done. This will prompt a notification on the Inspect app, allowing the driver to keep or reject repairments.

## Supported devices

The AT&T Fleet Complete Inspect App can be easily downloaded from the iTunes or GooglePlay stores and installed on your devices. AT&T Fleet Complete Inspect runs on both Android and Apple smartphones and tablets.
